

School Safety in Action

# How VOLT AI Transforms Response at Indian Creek School

*"I was the most resistant person to security technology you could imagine. Now I'm a full convert. What changed my mind was seeing how VOLT has been implemented in a culturally aware way that actually strengthens our community values."*

**Matt McCormick**  
Middle School Principal,  
ICS

## Problem

Indian Creek faced blind spots after hours, staff shortages for live monitoring, and lengthy investigations that strained resources and missed educational opportunities.

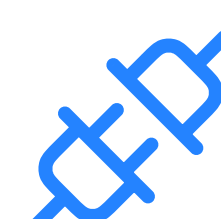

## Solution

VOLT AI transformed existing cameras into proactive safety tools, delivering real-time alerts that enabled faster interventions and behavior reinforcement without compromising school culture.

### Instant Alerts

Real-time warnings for emergencies and incidents

### Smart Camera Use

AI turns old cameras into active monitors

### Staff Workflow

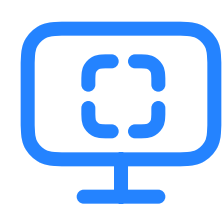

Alerts go to the right people at the right time

### Faster Resolutions

Turns hours of investigation into minutes with instant video context

# Why VOLT Became the Clear Choice

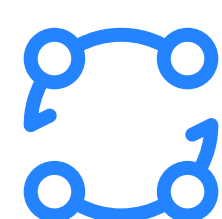

## Proactive Monitoring

VOLT transforms passive camera systems into active safety tools, not just video storage

## Staged Rollout

Alerts started with key staff to ensure accuracy before scaling campus-wide

## Integrated Response

Alerts matched with tailored workflows for medical, behavioral, and security events

## After-Hours Coverage

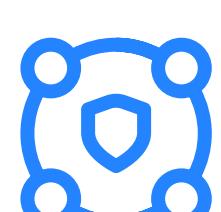

Detects incidents even when staff aren't on site, filling critical monitoring gap

# Key Benefits

## Real-Time Detection & Response

Incidents are identified instantly, allowing fast action.

## Expanded After-Hours Safety

Keeps students safe even when staff are off duty

## Operational Efficiency

Reduces investigation time from hours to seconds

# Future Plans

Indian Creek plans to expand VOLT AI access across more departments, strengthen cross-team coordination, and continue communicating the system's privacy safeguards to maintain trust and alignment with school values.

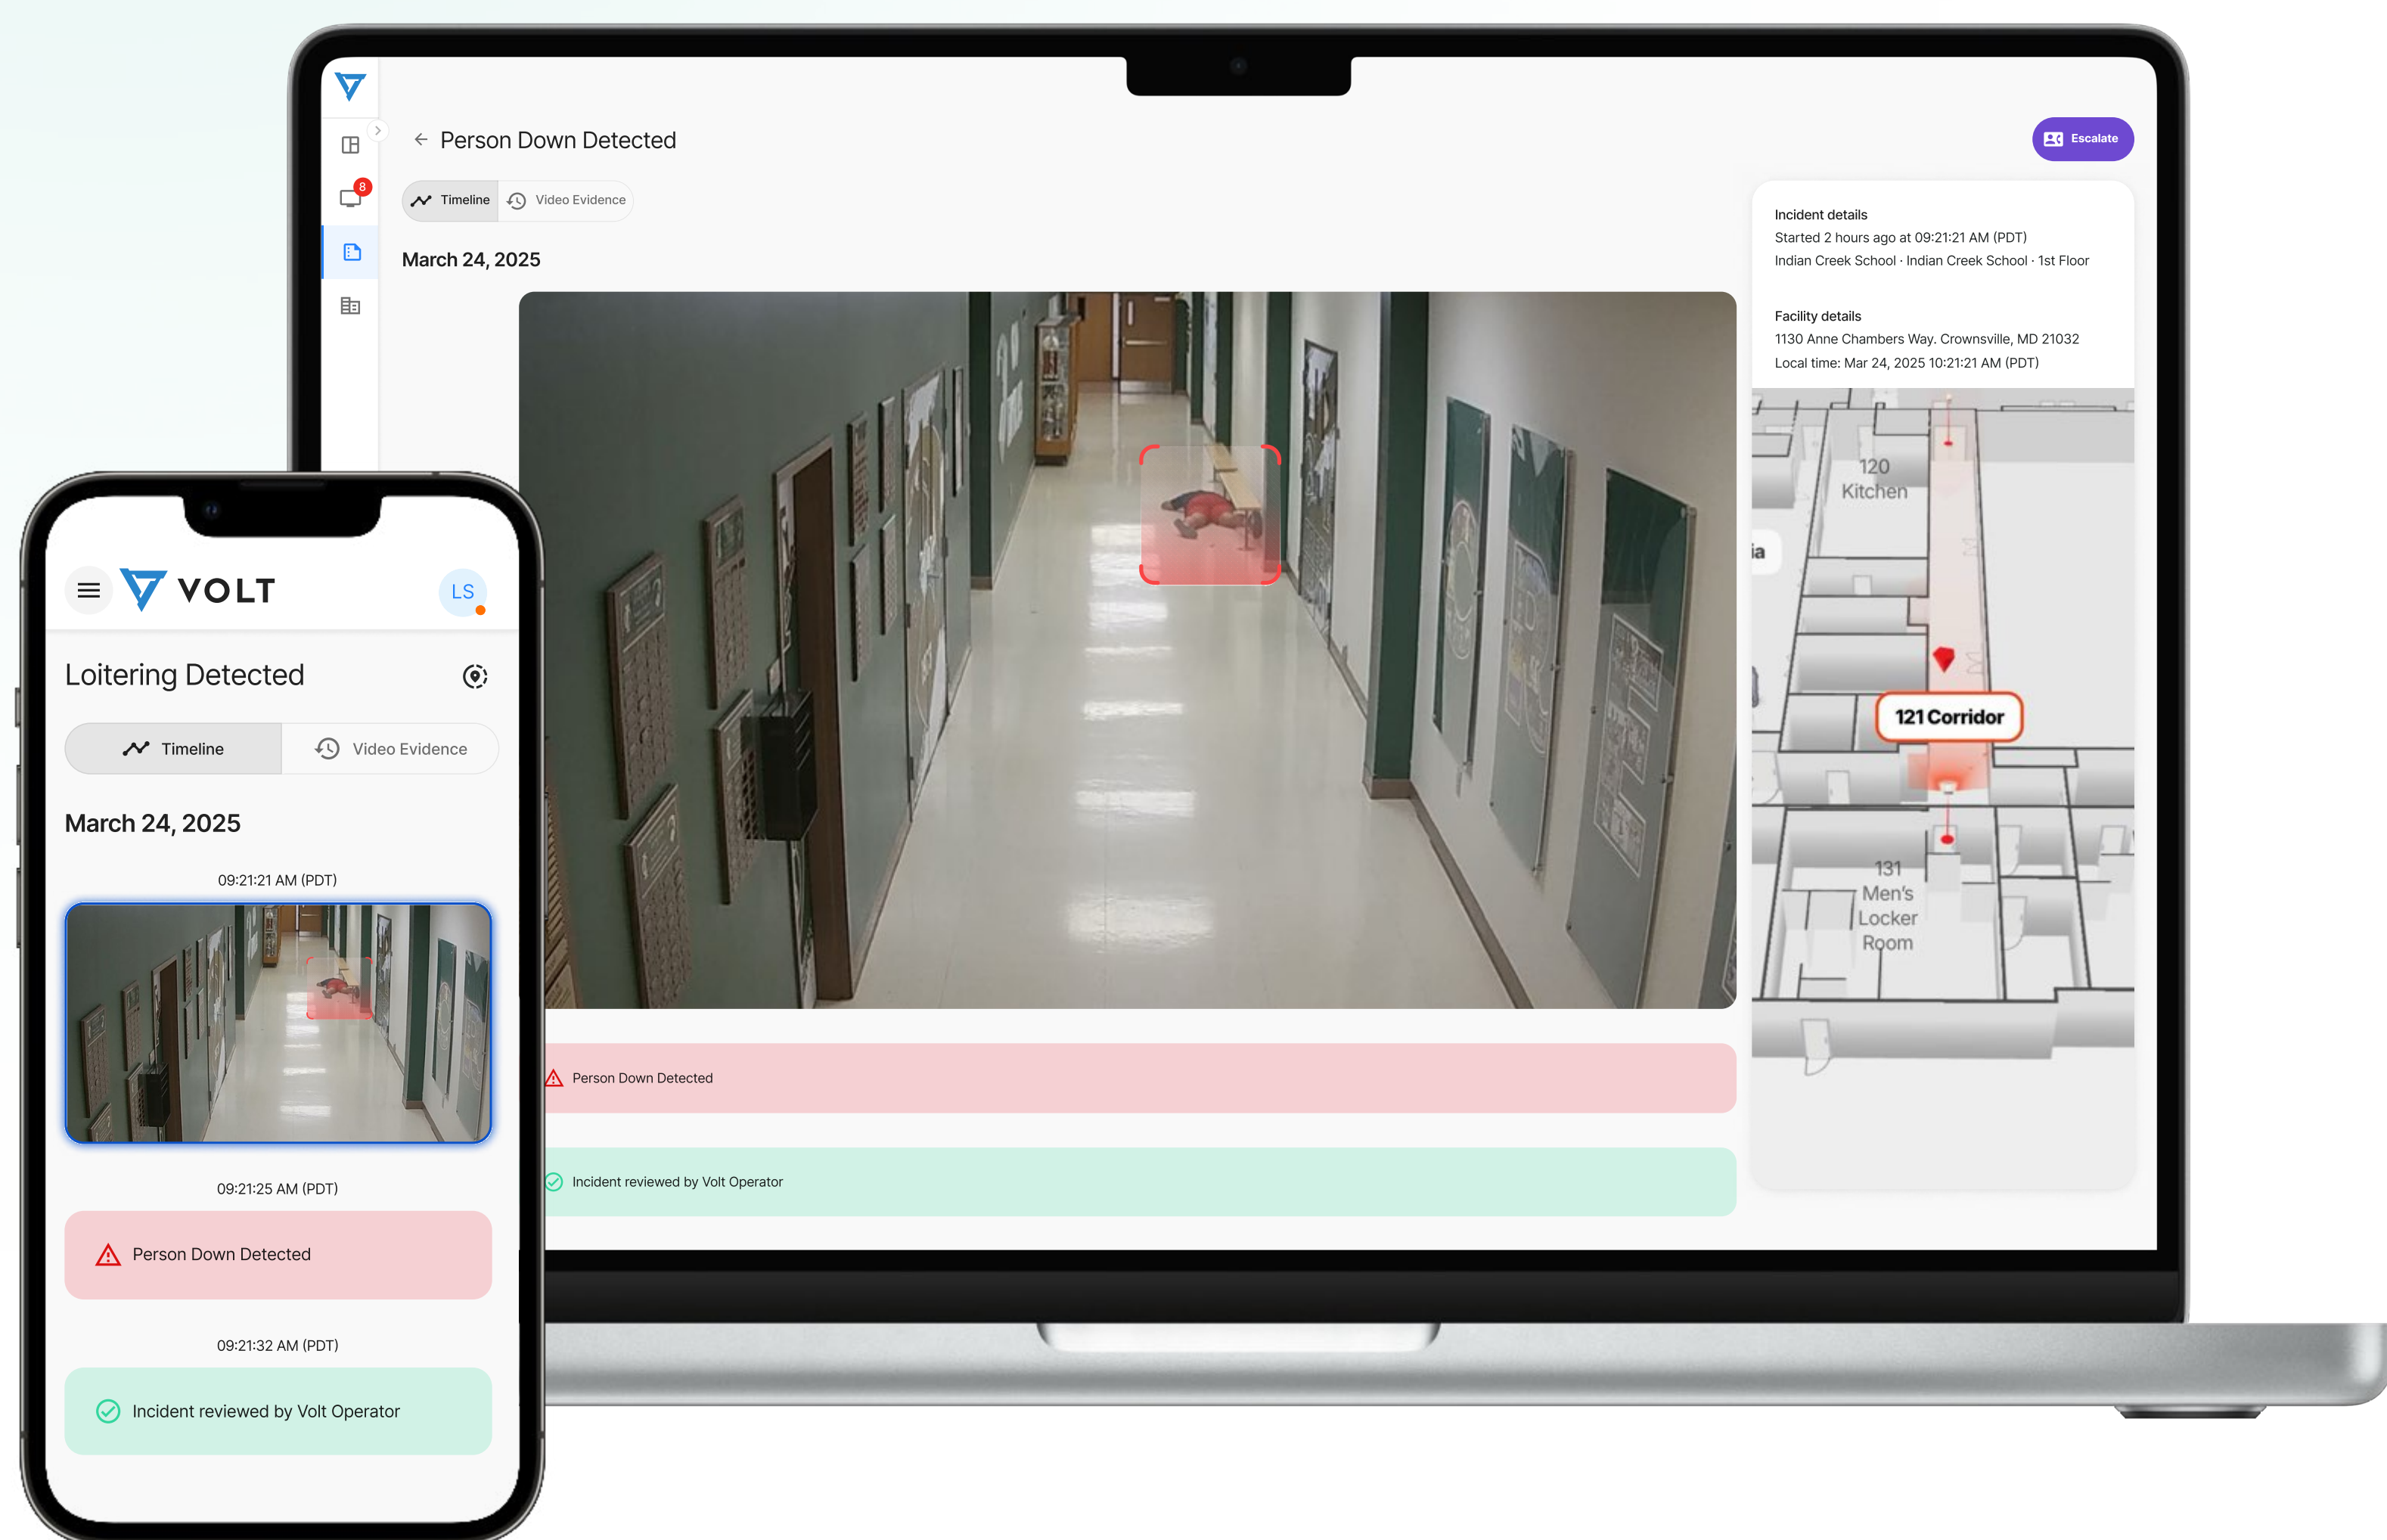

Ben Gehle

Chief Technology and Operations Officer

“We’ve been very measured in our approach to VOLT. Now that we’re relying on it more than ever before, we’re ready to expand access to our entire security network. The system has more than proven its value.”
